ACKNOWLEDGMENTS

Long time ago a German Theoretical Physicist named Albert Einstein said that “A man should look for what is, and not for what he thinks should be”. This quote makes me think about the reasons for my decision of studying a career at the University. Pursuing the knowledge to be a well prepared educator was my motivation. Now at the end of the path I have walked through, I am proud to say that it was a satisfactory journey. A journey that leaves in my mind bitter sweet memories that were and will always be part of my development as professional. As a result, I would like to thank Jehovah God for giving me the strength and knowledge throughout my career. Having his guidance it is the main reason of my success. I also would like to thank my beloved parents who were my support in every way possible. Moreover, would like to thank my professor director M Ed. Gilma de Láinez who since the beginning of this last step in the career was always compromised, patient and dedicated to the work was being developed. And finally, would like to thank my classmates I worked with throughout this paper.
